

Fixed Top Mount

Model 570

More than a simple top mounted base, the 570 allows for a full 450° of rotation. This means that light coverage can be a full circle, plus another quarter turn which ensures no blind spot. The 570 base has a built-in stop to prevent the internal wiring from binding.

A built-in friction mechanism ensures the light will not rotate when the vehicle is in motion.

Fixed Side Mount

Model 580

The 580 side mounted, fixed pedestal light allows the lamphead to rotate 450° and has a self adjusting friction brake to prevent arbitrary rotation.

The pedestal has a round mounting base attached to a side mount bracket.

*SPECTRA & OPTIMUM lampheads use a 2.75" bracket.
EVOLUTION & FOCUS lampheads use a 3.5" bracket.
OPTIMUM HID lampheads use a 5" bracket.*
